

FERROGUARD

Compact magnetite separator

We are revolutionizing
the installation and operation
of magnetite separators!

*The trick
with the grip!*

The problem solver for installer customers service:

Easy installation

Remove the old pump (DN 25 /180 mm) and install the new pump (DN 25 / 130 mm) with our FERROGUARD. Compatible with all standard 130 mm pumps.

No pipe work

No cutting required – saves 2–3 hours of installation time.

Compact and extremely versatile

Can be used before and after the pump and can be rotated by 360°.

Dry cleaning during operation

Turn the service handle with its patented system ball, wipe away magnetite – no flushing, no refilling needed.

Strongest magnetic power

on the market in the 50 mm compact separator range.

High efficiency

Full power with minimal impact on the circulation volume thanks to innovative Omega water flow.

Immediate protection

Immediately protects pumps, valves and components from magnetite.
